Research Associate (Postdoc) in Computer Vision for Biomedical Applications

SnT is a leading international research and innovation centre in secure, reliable and trustworthy ICT systems and services. We play an instrumental role in Luxembourg by fueling innovation through research partnerships with industry, boosting R&D investments leading to economic growth, and attracting highly qualified talent.

The Interdisciplinary Centre for Security, Reliability and Trust (SnT) invites applications from PhD holders in the general area of computer vision. SnT is carrying out interdisciplinary research in secure, reliable and trustworthy ICT systems and services, often in collaboration with industrial, governmental or international partners. SnT is active in several international research projects funded by the EU H2020 and the European Space Agency.

The Centre is currently expanding its research activities and is seeking highly motivated research associates who wish to pursue research in close cooperation with our partners. For further information you may check: www.securityandtrust.lu and <https://wwwfr.uni.lu/snt/research/cvi2>

We're looking for people driven by excellence, excited about innovation, and looking to make a difference. If this sounds like you, you've come to the right place!

Your Role

We offer an attractive Research Associate position in Computer Vision for Biomedical Applications and Digital Healthcare. The successful candidate will join the Computer Vision, Imaging and machine Intelligence (CVI2) research group headed by Prof. Djamila Aouada and collaborate with the Digital Medicine research group of Prof. Juchen Klucken at the Luxembourg Centre for Systems Biomedicine. Furthermore, this position offers multiple opportunities for collaboration with renown international institutions and industrial partners.

The successful candidate will be responsible of the following tasks:

- Shaping research activities and producing results in the field of Computer Vision in Biomedical Applications. Topics include, but, are not limited to:
- Human gait analysis.
- 3D body shape modelling.
- 3D pose estimation.

- Interacting and collaborating with international institutions, medical professionals and industrial partners.
- Disseminating results through scientific publications
- Coordinating research projects and delivering outputs
- Participating in proposal writing
- Providing support in setting up and running experiments
- Providing guidance to PhD and MSc students
- Organizing relevant workshops and demonstrations

Your Profile

- PhD degree Electrical Engineering, Computer Science, Biomedical Engineering, Applied Mathematics or a related field
- Relevant research experience in Biomechanics, Medical Imaging, Computer Vision and/or Robotics and/or Machine Intelligence
- Strong mathematical background
- Previous experience in medical applications is an advantage
- Strong development skills in Python and/or C++ are highly desirable
- Experience of working with one or more of the following frameworks: TensorFlow, PyTorch, Keras, etc.
- Experience with relevant libraries for 3D mesh and point cloud analysis is a plus.
- Experience with European projects (FP7/H2020) and/or Industrial partnership is considered an asset.
- Commitment, team player and a critical mind
- Fluent written and verbal communication skills in English are mandatory

Here's what awaits you at SnT

The University offers an 18-months employment contract and may be extended up to five years. The University offers highly competitive salaries and is an equal opportunity employer. You will work in an exciting international environment and will have the opportunity to participate in the development of a newly created research centre.

Exciting infrastructures and unique labs. At SnT's two campuses, our researchers can take a walk on the moon at the LunaLab, build a nanosatellite, or help make autonomous vehicles even better

The right place for IMPACT. SnT researchers engage in demand-driven projects. Through our Partnership Programme, we work on projects with more than 45 industry partners

Be part of a multicultural family. At SnT we have more than 60 nationalities. Throughout the year, we organise team-building events, networking activities and more

Find out more about us!

- Contract Type: Fixed Term Contract 18 Month - with possibility to extend up to 5 years
- Work Hours: Full Time 40.0 Hours per Week
- Location: Kirchberg
- Job Reference: UOL04545
- Applications, written in English should be submitted online and should include:
- Curriculum Vitae (including your contact address, work experience, publications)
- Cover letter indicating the research area of interest and your motivation
- Contact information for 3 referees

Early application is highly encouraged, as the applications will be processed upon reception. Please apply ONLINE formally through the HR system. Applications by Email will not be considered.

The University of Luxembourg embraces inclusion and diversity as key values. We are fully committed to removing any discriminatory barrier related to gender, and not only, in recruitment and career progression of our staff.

About the University of Luxembourg

University of Luxembourg is an international research university with a distinctly multilingual and interdisciplinary character. The University was founded in 2003 and counts more than 6,700 students and more than 2,000 employees from around the world.

The University's faculties and interdisciplinary centres focus on research in the areas of Computer Science and ICT Security, Materials Science, European and International Law, Finance and Financial Innovation, Education, Contemporary and Digital History.

In addition, the University focuses on cross-disciplinary research in the areas of Data Modelling and Simulation as well as Health and System Biomedicine. Times Higher Education ranks the University of Luxembourg #3 worldwide for its "international outlook," #20 in the Young University Ranking 2021 and among the top 250 universities worldwide.
