LECTURER - COMPUTER SCIENCE

Job description

Introduction

Are you passionate about shaping the next generation of tech innovators? Our client is seeking a dynamic Lecturer: Computer Sciences to join their campus in Roodepoort. In this role, you'll deliver engaging lectures, support student development, and contribute to research initiatives—all while staying at the forefront of cutting-edge technologies. If you thrive on excellence, collaboration, and continuous learning, this is your opportunity to make a real impact in higher education.

Duties & Responsibilities

Lecturing

- Lecture on programmes across various modes of delivery where relevant
- Marking of assessments and feedback to students in subjects lectured. May be required to internally moderate assessment scripts that fall within their subject fields, where necessary across the college's sites of delivery

Lecturer Development and Support

- Assist in lecturer development and support processes and procedures. This may include conducting peer reviews, facilitating workshops and one-on-one consultations

Student Development & Support

- Championing/leading and managing academic development and support for a specific programme and its students
- Tracking student success and implementing support interventions where required

Research & Scholarship

- The incumbent is required to promote a culture of scholarship within their practice, discipline and campus/team and is also required to contribute towards the campus achieving its annual research output targets

Desired Experience & Qualification

COMPETENCIES REQUIRED:

- Superior communication (written and verbal) and organisational skills
- Demonstrated ability to manage work and self proactively
- Able to demonstrate a proven track record of effective teaching in subject area based on a reflective practice
- Able to demonstrate the ability to manage relationships with managers and staff effectively in terms of motivation, quality and performance
- Passion for Customer Service
- Experience in the use of technology to enhance learning is an added advantage

MINIMUM EDUCATION REQUIREMENTS

- Masters in Information Technology or Computer Science or
- Any related field (NQF level 9) preferable.

MINIMUM WORK EXPERIENCE REQUIRED

- Minimum of 3 years of Teaching and Learning experience (preferably in a teaching/lecturing environment)
- Lecturing experience in programming.
- Lecturing experience in databases and/or programming.

- Work experience as a software developer/ application developer/ programmer.
- Work experience as a software developer/ application developer/ mobile programmer.

EXPERIENCE IN ONE OR MORE OF THE FOLLOWING

- NET (C#, .NET Core, ASP.net MVC, Blazor, UWP)
- JavaScript (React, Angular, etc.)
- Cloud Development (Azure, AWS, etc.)
- Mobile Application Development (Android/iOS)
- Database Systems (SQL, Oracle, NoSQL, Firebase, MongoDB, etc.)
- Operating Systems (Windows/Linux)

Package & Remuneration
