Lecturer in Software Engineering

Lecturer in Software Engineering

Hubei, Wuhan

Ref: 3185

Fixed-Term Contract

Lecturer in Software Engineering - Manchester Metropolitan / Hubei University Joint Institute.

If your subject expertise lies in Software Engineering and you would relish the opportunity to gain exposure to teaching and learning in China, develop research partnerships and experience Chinese culture first-hand, the Manchester Metropolitan Joint Institute (MHJI) at Hubei University could be your ideal next career move.

About us.

As one of the top 200 modern universities in the world, Manchester Metropolitan is renowned for its research and teaching in areas such as science and engineering, business, creative writing, architecture and fashion.

To build upon our success, and as part of a long-term plan to enhance our reputation, further develop our ties with China and promote study opportunities in Manchester, we recently opened a new office in Wuhan. This is an exciting strategic project for the University that will raise our international profile and will also enable the Lecturers we appoint to benefit from a truly unique experience.

The opportunity.

As a Lecturer in Software Engineering, you'll be responsible for developing and delivering a variety of high quality undergraduate and postgraduate programs. You'll also have the opportunity to develop research partnerships with colleagues at Hubei University and / or continue to plan and carry out your own research and publish the results.

Promoting the department, faculty and university by supporting a range of activities will be

important too. And, when it comes to seeking knowledge transfer and business engagement opportunities, developing partnerships to share best practice or exploring the possibility of collaborations, again, we'll look to you to play your part.

To succeed, you'll need a good first degree and PhD in a relevant discipline (or equivalent qualifications). You'll also need a PGCE, Certificate of Education, PGCLTHE, Fellowship of the Higher Education Academy or an agreed professional equivalent (or willingness to obtain within three years of appointment).

Membership of relevant professional bodies is also required, as is an in-depth understanding of the subject Computer Science, including recent developments in Software Engineering. Committed to ensuring teaching content is stimulating, inspiring, appropriately challenging and reflective of the current state of the discipline and / or professional subject bodies, you're also adept at using initiative, creativity and judgment when undertaking research and scholarly activities.

Further details.

The appointment is initially for four years, with an extension of a further four years by mutual agreement. You'll be based at Hubei University's campus in Wuhan from September to May, with paid return flights to the UK mid-way through the year for a vacation. A comprehensive induction program to teaching and living in China will be provided, along with ongoing support to ensure you enjoy a good working environment, plus free accommodation on campus at Hubei University.

Manchester Metropolitan University is committed to supporting the rights, responsibilities, dignity, health and wellbeing of staff and students through our commitment to equality, diversity and inclusion.

We promote applications from all sections of the community, irrespective of background, belief or identity, recognizing the benefits that a diverse organization can bring and particularly encourage applications from groups which are underrepresented in the University workforce.

We recognize the benefits and importance of an environment that supports flexible working and are open to conversations about this throughout the application process.
